

Cloud Go-To-Market Strategy

Empowering partners to capture the cloud market opportunity

Understanding “Everything-as-a-Service” (XaaS)

Moving beyond software and data delivery, “Everything-as-a-Service” has become a mindset for consumers as much as it is a strategy for businesses. From cellular phone plans to meal delivery services, streaming subscriptions to cloud backup, the XaaS model is everywhere.

Is your business equipped to meet your clients’ demand for the latest and greatest in software, technology, and services— solution designed to their individual preferences.

Now, through the D&H Cloud Marketplace, your business can offer comprehensive and customizable XaaS solutions focused on specific SMB needs by bundling together hardware, software, and services charging a single, monthly payment over a designated term.

With careful planning and the right strategy, launching a XaaS model empowers Managed Service Providers (MSPs) and Value-Added Resellers (VARs) to better serve the SMB space and ensure growth through a recurring revenue stream.

XaaS benefits your business:

Add your own services & support to create customized XaaS solutions within our automated platform

- Establish partnerships by bundling hardware, software, & services into a subscription-based offering
- Flexible financing expands client purchasing power, minimizing constraints of long-term commitments
- Eliminate your risk by receiving revenue up-front in order to protect liquidity and your balance sheet

XaaS benefits your clients:

- Cloud-based data is secure & accessible 24/7x365 allowing a mobile workforce to be more efficient
- Flexibility to change subscriptions on-demand by personalizing a process or choosing a new vendor
- Choose to scale up or down to a fit a changing business climate
- Expand only as needed, allowing clients to invest in strategy rather than infrastructure or maintenance
