Prepare for Windows 10 End of Life

Microsoft has announced that Windows 10 will reach its end of life on October 14, 2025. After this date, no security updates or technical support will be available, leaving organizations vulnerable to security threats, compliance issues, and software compatibility challenges. This significant transition presents an ideal opportunity to upgrade not only your operating system but also your hardware and connectivity solutions. T-Mobile 5G connected laptops running Windows 11 from D&H offer the perfect combination of cutting-edge technology and reliable connectivity to futureproof your business operations.

Top 5 Reasons to Make the Switch

Unmatched Network Availability and Coverage:

T-Mobile's 5G network is the largest and most reliable in America, providing consistent connectivity virtually anywhere your employee's work. Unlike Wi-Fi, which is limited by physical access points, T-Mobile's 5G network offers:

- Coverage in areas where Wi-Fi isn't available
- Seamless transitions between locations without connection interruptions
- Connectivity in remote work settings, customer sites, and while traveling
- Reduced IT support burden by eliminating the need to configure multiple Wi-Fi networks

Superior Reliability for Critical Business Applications:

T-Mobile's 5G network is the largest and most reliable in America, providing consistent connectivity virtually anywhere your employee's work. Unlike Wi-Fi, which is limited by physical access points, T-Mobile's 5G network offers:

- Coverage in areas where Wi-Fi isn't available
- Seamless transitions between locations without connection interruptions
- Connectivity in remote work settings, customer sites, and while traveling
- Reduced IT support burden by eliminating the need to configure multiple Wi-Fi networks

Enhanced Security Beyond Traditional Connections:

As cybersecurity threats continue to evolve, T-Mobile 5G connected laptops offer superior protection compared to devices relying solely on Wi-Fi:

- Built-in encryption and authentication at the cellular network level
- Elimination of risks associated with public Wi-Fi networks
- Reduced attack surface by bypassing potentially compromised local networks
- Simplified security management through centralized connectivity controls
- Compatibility with Windows 11's advanced security features including hardware-based isolation

Measurable Productivity Improvements:

Organizations implementing 5G connected Windows 11 laptops report significant productivity gains:

- Elimination of connectivity-related downtime, saving an average of 100+ minutes per week per employee
- Faster access to cloud resources and large files
- Improved collaboration capabilities through reliable video and audio quality
- Reduced IT support requirements for connectivity issues
- Enhanced employee satisfaction through seamless work experiences regardless of location

Flexible Options for Businesses of All Sizes:

D&H offers T-Mobile 5G connected laptops to suit organizations of any scale:

- Diverse device selection from leading manufacturers with various price points and specifications
- Scalable data plans that can be tailored to individual user needs
- Choice between traditional CAPEX acquisition with T-Mobile subsidies or the innovative OPEX-based PCaaS model
- Bundled support services to simplify ongoing management

TAKE THE NEXT STEP

The Windows 10 end-of-life deadline creates an urgent need to evaluate your technology strategy. T-Mobile 5G connected Windows 11 laptops from D&H provide the ideal solution to address this challenge while simultaneously enhancing your organization's connectivity, security, and productivity.

Contact your D&H partner representative today to explore available devices, connectivity plans, and acquisition options tailored to your specific business requirements.
