

Why hard drives included?

Save time, save money, and save the hassle with hard drives included.

Setup Effort Comparison

* Variables include RAID level, number of drives, and activities while RAID initializes

Save Time

Buffalo systems are easy-to-use, saving valuable time and effort. Other manufacturer's product requires users to spend time selecting, buying, installing, testing, and configuring the hard drives. Buffalo systems are ready to go with hard drives included allowing customers to be up and running within minutes. Simply remove the NAS device from the box, power-up and connect.

Save Hassle

Buffalo systems ship with hard drives that have been specifically selected and tested for the product they are designed for. Eliminate the hassle of searching, purchasing, testing, and setting-up the correct hard drives. The Buffalo warranty covers the full system including hard drives. Customers simply have one call to make regarding any system or hard drive.

Save Money

Time is money. Buffalo systems require less setup and management time, allowing you to concentrate on core activities. If any hardware issues arise, including hard drives, simply contact Buffalo's 24/7 North American-based support.

BUFFALO'S NETWORK ATTACHED STORAGE

Why Buffalo NAS?

Scale as you go devices provide flexibility to fit today's needs with the capabilities for tomorrow.

Hard drives included units go through a rigorous quality control process.

Buffalo spare hard drives are tested in each individual storage sector before offered on the market.

Security

Buffalo NAS feature physical and digital security features.* Physical Security is achieved with Buffalo designed Boot Authentication to lock usage upon theft, Kensington security slot, and Chassis hard drive door lock. Digital Security features include 256 bit AES encryption, system based encryption and closed operating system.

* Reference product datasheet for product security features.

Higher Quality

Buffalo hard drives undergo a 5 step testing and quality process beginning with strict procurement guidelines for the hard drive manufacturers and ending with post production quality control inspection.* Buffalo replacement hard drives are put through a rigorous zero write process in which every individual sector of the HDD is tested. Simply put, Buffalo invests time with each hard drive to ensure maximum quality is delivered to every device.

* Specific to TeraStation NAS

Easy to use

Buffalo NAS devices and the ownership experience are designed to be easy to use. Buffalo prides itself in delivering peace of mind with customer service, ease-of-use and product quality. This can be experienced with always available pre and post support service, hard drives included products, and straight forward user interface design.

Solutions

Buffalo TeraStation and LinkStation NAS devices address a wide range of use cases fitted to the needs and budgets of individual consumer requirements to data intensive businesses with demanding performance needs. Always evolving, the Buffalo NAS operating system continues to deliver new and improved feature support.

Reliable

All Buffalo NAS devices include standard 2 to 3-year hardware warranty support including hard drive replacement. Optional replacement warranty services provide next business day support, keep your hard drive options, and 5-year warranty service extension.
