Intel® Server Systems

Industry-leading innovation.

World-class services and support.*

Intel's world-class services and support make it easier to find, buy, configure, deploy, and operate the servers that power your business.

Intel and its partners simplify every stage of the server lifecycle.

Purpose-Built Servers

Choose from a variety of purpose-built servers, each packed with unique innovation to power your digital transformation.

- Unparalleled platform-wide innovation
  - Rich server portfolio and choice of integration levels to meet your needs
  - High-quality manufacturing
  - Hardware validated by Intel
  - Software certified by software vendors for Intel® Data Center Blocks
  - Collaboration opportunities to define what's new and what's next

Pre-Purchase

Simplified server selection and optimization based on your workload and infrastructure needs.

- Assistance finding and designing the ideal solution
  - Competitive pricing
  - Marketing events to discover what's new
  - Professional pre-sales technical support
  - Hardware sample program enables "try before you buy" for large purchases

Purchase

Purchase servers faster, easier and with greater confidence.

- Intel® Transparent Supply Chain helps verify authenticity and firmware version of servers and components
  - Accelerated shipping via Stock Visibility Program
  - Configure-to-Order generates quotes for products that fit your needs
  - Worldwide distribution with competitive lead times

Deployment

Accelerate and simplify deployment with help from partners and Intel.

- 3-year warranty (optional 5-year available)
  - Accelerate and simplify setup using Intel's online documentation, training collaterals and the latest software and firmware downloads and tools
  - Easier troubleshooting through an extensive knowledge base

Operations and Maintenance

Ensure your servers stay up and running with unprecedented IT expertise at your fingertips.

- Onsite support available through Intel® Premier Support
  - Access to Intel's extensive knowledge base and up-to-date drivers and firmware through Intel's support site
  - Rapid parts and product replacement
  - Global Intel technical support throughout server lifecycle
  - Access to Intel engineers to speed up resolution of complex problems

Extensive channel of partners adds value and offers deep knowledge of Intel portfolio

Significantly expand your IT expertise to accelerate digital transformation.

Partners

Intel partners are experts, trained to help you find, deploy and manage the right servers for your needs.

Intel Design Engineers

Intel design engineers create and support platform-wide hardware innovation.

Intel Software Engineers

Intel software engineers help optimize leading software, frameworks, tools and operating environments to run better and with greater security on Intel® technologies.

Intel Solution Architects

Intel solution architects help create reference designs that integrate the ideal stack of hardware and software for a wide variety of workload needs.

Intel Technical Support

Intel's global network of tech support experts are available to help troubleshoot and resolve issues from deployment through operations and management.

Ecosystem Partners

Intel is supported by the world's largest ecosystem of hardware and software suppliers, partnering with them to create purpose-designed, market-ready solutions to drive your business forward.
