A woman with curly hair, wearing a leopard-print top, is shown in profile, looking intently at a laptop. The scene is dimly lit with warm, bokeh-style background lights, suggesting a creative or professional workspace at night. The laptop screen displays a colorful, abstract image.

# 13<sup>th</sup> Gen Intel<sup>®</sup> Core<sup>™</sup> Mobile Processors: Achieve Breakthrough Performance

13<sup>th</sup> Gen Intel<sup>®</sup> Core mobile processors deliver the next generation of performance hybrid architecture to elevate what's possible on a laptop.<sup>1</sup> HX series offers the world's highest performing mobile CPU, with more cores and threads, more L2 cache per core, and best-in-class I/O options; while the full mobile line-up provides a choice for every need—all harnessing new performance cores to handle demanding workloads and efficient cores to offload background tasks. Intel<sup>®</sup> Evo<sup>™</sup> platform support sets higher benchmarks for processing power, connectivity, and battery life to bring you a laptop that keeps up with you on the go. With the latest platform technologies for data-intensive applications, ultra-fast connectivity, accelerated AI workloads, and power-performance optimization, 13<sup>th</sup> Gen Intel<sup>®</sup> Core mobile processors enable incredible gaming, creation, and productivity.

## HX Series— Elite Gaming & Creation, Anywhere

The expanded HX series drives breakthroughs for intense workloads, offering desktop-class performance in a just ~20mm-thin mobile form factor. With the maximum available core count—8 performance cores and 16 efficient cores—and the highest I/O and memory available, HX series supercharges elite gaming, 3D content creation and rendering, large file manipulations, and other heavy-duty tasks. The two-chip platform, with discrete Platform Controller Hub, brings greater L2 cache per core and up to 128 GB of RAM, two DIMMs per DDR5 channel, PCIe 5.0 (16 lanes) support,<sup>2</sup> Intel® Dynamic Power Share,<sup>3</sup> and a range of other advanced technologies. Competitive gamers, dynamic creators, and high-powered professionals now have the performance to achieve more, anywhere.

## Boundary-Pushing Technologies

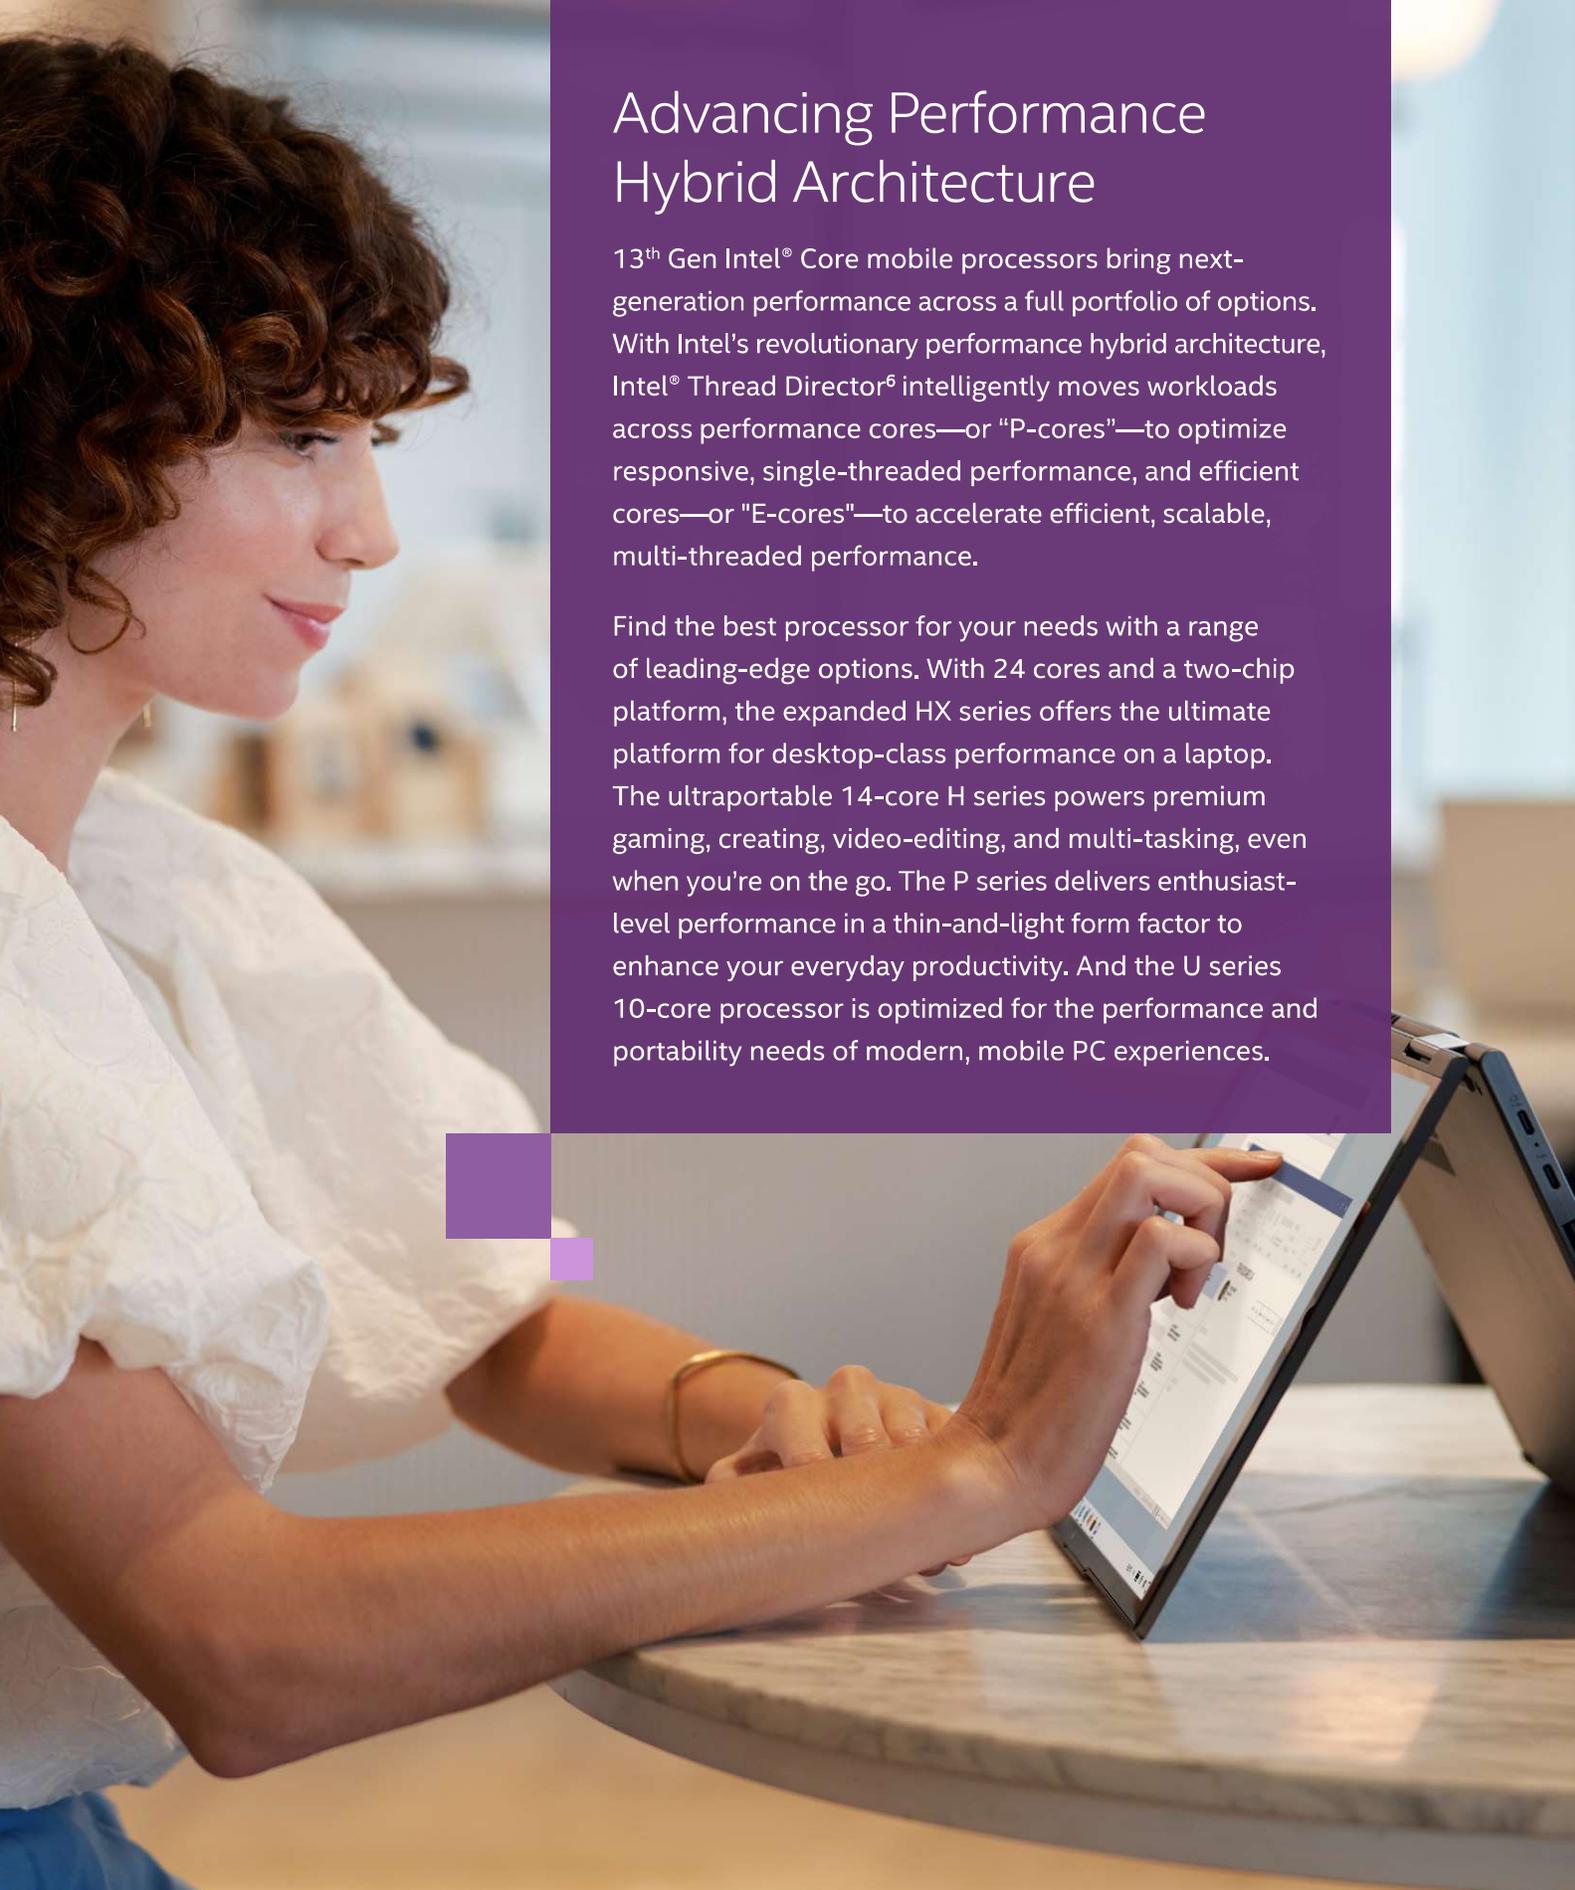

13<sup>th</sup> Gen Intel® Core mobile processors feature a suite of innovative platform technologies to enrich every aspect of laptop experiences. Capably handle large data sets and data-intensive apps with support for up to 16 lanes of PCIe 5.0,<sup>2</sup> DDR5 memory, and up to four Thunderbolt™ 4 ports. Support for Intel® Wi-Fi 6/6E (Gig+) unlocks ultra-fast connectivity, with nearly 3X faster (Gig+) Wi-Fi speeds,<sup>4</sup> while Intel® Bluetooth® 5.2 technology enhances wireless device connectivity, with speeds up to 2X faster than Bluetooth® 4.2.<sup>4</sup> The new Intel® Dynamic Power Share intuitively shifts power between the CPU and 3<sup>rd</sup> party discrete GPUs to maximize performance.<sup>3</sup> And next-generation AI capabilities, including Intel® Gaussian & Neural Accelerator (GNA) and the option for a new discrete VPU AI accelerator,<sup>5</sup> enable seamless video conferencing for today's hybrid work environment.

Elevate gaming and streaming with advanced technologies built for your needs. Features available on Intel® Arc™ graphics products are now available on Iris® X<sup>e</sup> Graphics, such as X<sup>e</sup> Super Sampling (X<sup>e</sup>SS) and Arc Control. Also new for Intel® Iris® X<sup>e</sup> Graphics is Endurance Gaming, which extends your gameplay on battery.

## Advancing Performance Hybrid Architecture

13<sup>th</sup> Gen Intel® Core mobile processors bring next-generation performance across a full portfolio of options. With Intel's revolutionary performance hybrid architecture, Intel® Thread Director<sup>6</sup> intelligently moves workloads across performance cores—or "P-cores"—to optimize responsive, single-threaded performance, and efficient cores—or "E-cores"—to accelerate efficient, scalable, multi-threaded performance.

Find the best processor for your needs with a range of leading-edge options. With 24 cores and a two-chip platform, the expanded HX series offers the ultimate platform for desktop-class performance on a laptop. The ultraportable 14-core H series powers premium gaming, creating, video-editing, and multi-tasking, even when you're on the go. The P series delivers enthusiast-level performance in a thin-and-light form factor to enhance your everyday productivity. And the U series 10-core processor is optimized for the performance and portability needs of modern, mobile PC experiences.

## 13<sup>TH</sup> GEN INTEL® CORE MOBILE PROCESSORS: FEATURES AT A GLANCE

FEATURE	BENEFIT
Performance Hybrid Architecture <sup>1</sup>	Integrates two core microarchitectures into a single die, prioritizing and distributing workloads to optimize performance.
Intel® Thread Director <sup>6</sup>	Optimizes workloads by helping the OS scheduler intelligently distribute workloads to the optimal cores.
Support for up to DDR5 5600 MT/s	This industry first memory technology that supports fast frequencies and high bandwidth and throughput, leading to enhanced workflow and productivity.
Support for up to DDR4 3200 MT/s	Supports faster frequencies and higher bandwidth and throughput, leading to enhanced workflow and productivity.
Up to 16 CPU PCIe 5.0 lanes <sup>2</sup>	Latest generation PCIe lanes deliver greater performance efficiency, smooth gameplay and increased workflow productivity.
Up to 4 CPU PCIe 4.0 lanes	Offers up to 16 GT/s for fast access to storage and peripheral devices with up to 4 PCI Express 4.0 lanes.
Intel® Dynamic Power Share <sup>3</sup>	Dynamically shifts power between Intel CPU and 3rd party discrete GPU to optimize platform thermals and unleash the best performance and end user experience.
Intel® Deep Learning Boost (VNNI)	Accelerates AI inference—vastly improving performance for deep learning workloads.
Intel® Gaussian & Neural Accelerator 3.0 (GNA 3.0)	Runs AI workloads on accelerator to more efficiently blur video background and suppress background noise.
Intel® Wi-Fi 6E (Gig+)	Intel® Wi-Fi 6E is nearly 3 times faster and with 40% higher peak data rates compared to the standard 902.22ac 2x2 and dual spatial stream 802.11ac, respectively, for high-speed file sharing, smooth 4K streaming, and ultra-responsive surfing and gaming. <sup>4</sup>
6 GHz Spectrum for Wi-Fi	The first new band since 2003, it more than doubles the contiguous clean spectrum from 480 MHz to 1200 MHz and increases Gigabit Wi-Fi options from 2 160 MHz channels to 7, with no legacy Wi-Fi interference.
Intel® Connectivity Performance Suite	Intelligent optimization of Wi-Fi performance for up to 66% lower latency for voice/video calls, 4X better video streaming resolution, and 30% faster network speeds. <sup>4</sup>
Intel® Bluetooth® 5.2 Technology	Enhances PC-to-device connectivity for one-click device pairing and easier file sharing, up to 20% less audio power consumption compared to standard Bluetooth® on select models, and 2X faster speeds than Bluetooth® 4.2. <sup>4</sup>
Up to 4 Thunderbolt 4 Ports	Thunderbolt 4 port is the best-in-class USB-C. With 40Gb/s bandwidth and stringent testing for interoperability, it offers the simplest, most reliable and fastest cable connection for power, data, and display over a single cable.
Overclockable <sup>7</sup>	All SKUs of HX will support overclockability (full/partial), allowing users to access higher CPU speeds.

## Product Brief 13<sup>th</sup> Gen Intel® Core Mobile Processors

### Notices & Disclaimers

Complete and latest CPU spec information can be found in the EDS or at <http://ark.intel.com>

For more complete information on configurations and workloads, visit [www.intel.com/PerformanceIndex](http://www.intel.com/PerformanceIndex).

Intel technologies may require enabled hardware, software or service activation. No product or component can be absolutely secure.

Intel® processor numbers are not a measure of performance. Processor numbers differentiate features within each processor family, not across different processor families.

All Intel® Evo branded designs must meet demanding thresholds for key mobile user experiences like responsiveness and battery life; individual device performance may vary. Details at [www.intel.com/performance-evo](http://www.intel.com/performance-evo).

All versions of the Intel® vPro® platform require an eligible Intel® Core processor, a supported operating system, Intel® LAN and/or WLAN silicon, firmware enhancements, and other hardware and software necessary to deliver the manageability use cases, security features, system performance and stability that define the platform. See [intel.com/performance-vpro](http://intel.com/performance-vpro) for details.

The frequency of cores and core types varies by workload, power consumption and other factors. Visit [www.intel.com/content/www/us/en/architecture-and-technology/turbo-boost/intel-turbo-boost-technology.html?wapkw=turbo%20boost%20technology](http://www.intel.com/content/www/us/en/architecture-and-technology/turbo-boost/intel-turbo-boost-technology.html?wapkw=turbo%20boost%20technology) for more information.

All processors are lead-free (per EU RoHS directive July 2006) and halogen free (residual amounts of halogens are below November 2007 proposed IPC/JEDEC J-STD-709 standards). All processors support Intel® Virtualization Technology (Intel® VT-x, VT-d).

See [ark.intel.com](http://ark.intel.com) for more specification details

Your costs and results may vary.

1. Performance hybrid architecture combines two core microarchitectures, Performance-cores (P-cores) and Efficient-cores (E-cores), on a single processor die first introduced on 12th Gen Intel® Core processors. Select 12th and 13th Gen Intel® Core processors do not have performance hybrid architecture, only P-cores, and have same cache size as prior generation; see [ark.intel.com](http://ark.intel.com) for SKU details.
2. PCIe 5.0 only available on HX and H Series.
3. Please work through Intel's Customer Engineering and Account teams to explore enabling options. Contact your Intel representative.
4. See [intel.com/performance-wireless](http://intel.com/performance-wireless) for details. Results may vary.
5. For select designs only. See [ark.intel.com](http://ark.intel.com) for details.
6. Built into the hardware, Intel® Thread Director is provided only in performance hybrid architecture configurations of 12th Gen or newer Intel® Core processors; OS enablement is required. Available features and functionality vary by OS.
7. Available only on 13th Gen Intel® Core HX Series SKUs.
8. All SKUs support CPU, GPU, and memory overclocking.
9. Max Turbo Frequency for P-cores may include Intel® Turbo Boost Max 3.0 and Thermal Velocity Boost.
10. i9-13900HK supports CPU Overclocking. Memory Ratio override is not supported.

## Product Brief 13<sup>th</sup> Gen Intel® Core™ Mobile Processors

<sup>11</sup>.All H-series type 4 SKUs only support LPDDR5/X (6400MT/S). See [ark.intel.com](https://ark.intel.com) for more specification details.

<sup>12</sup>.Max Turbo Frequency for P-cores may include Intel® Turbo Boost Max 3.0; Intel® Thermal Velocity Boost not supported on 13th Gen mobile processors.

<sup>13</sup>.All SKUs support up to DDR5 (5200 MT/S)/DDR4 (3200 MT/S)/LPDDR4 (4267 MT/S) memory (LPDDR5 frequencies are listed).

<sup>14</sup>.All SKUs support up to DDR5 (5200 MT/S)/DDR4 (3200 MT/S)/LPDDR5 (6400 MT/S)/LPDDR4 (4267 MT/S) memory.

<sup>15</sup>.Intel® Thermal Velocity Boost not supported on 13th Gen mobile processors.
