

# ABSOLUTE®

Secure Your Data, Manage And Track Devices, And Update Applications Using An Unbreakable Connection To Every Endpoint - On Or Off Your Network.

Lenovo

Endpoints go dark, data drifts without notice, users neglect security policies, and controls are disabled daily. Lack of endpoint visibility, irregular compliance standards, and difficulty to prevent and remediate device drift, loss or theft are some of the common security challenges that IT managers face today.

With Absolute, IT managers get full visibility and control over all their devices and apps through a single pane of glass with Persistence® technology. The self-healing connection keeps critical applications up-to-date and sensitive data remains protected, even when accessed outside of your corporate network.

## LENOVO AND ABSOLUTE - BETTER TOGETHER

Lenovo has partnered with industry leader Absolute to bring endpoint security and resilience to fortify your organization against external threats. All Lenovo devices have Absolute's software embedded into the firmware of their devices before they leave the factory.

Lenovo and Absolute have partnered since 2005, offering a broad portfolio of solutions several of which are unique to Lenovo.

### ABSOLUTE VISIBILITY™

View your entire device fleet through a cloud-based dashboard even if configurations change or devices leave the network - thanks to Absolute's persistent self-healing connection. Automatically inventory all your software and hardware assets and ensure optimal usage and compliance.

### ABSOLUTE CONTROL™

Regain control of all your endpoints, all the time even if they are off your organization's network. Safeguard your device with Geofencing capabilities and lock them down if they stray outside your set boundaries. Freeze at-risk devices and selectively delete data from unsecured endpoints with compliance certificates. Further, get unprecedented control over endpoint security configurations by remotely managing the supervisor password for supported Lenovo devices<sup>1</sup>

### ABSOLUTE RESILIENCE™

Extend Absolute Persistence to your mission-critical apps, granting them the power to heal and reinstall themselves whenever they're disabled, altered, or uninstalled. Audit the usage of web tools and content to ensure user compliance and scan your endpoints for sensitive data with data discovery features. In case of ransomware attacks, query and remediate your entire device fleet with a library of pre-built and customized scripts. Further, get help from Absolute's team of experts to recover stolen devices.

technology  
for all

Lenovo

### LENOVO PATCH

Lenovo Patch is an SCCM plug-in that integrates directly into the console and helps speed up and simplify the otherwise tedious task of updating BIOS, driver, firmware, and third-party software. Patching is critical to both maintenance and security. Lenovo Patch saves IT time by simplifying the unpredictable task of monitoring software update availability and identifying needed updates. With a persistent self-healing agent powered by Absolute, IT admins can be assured that all patches reach the endpoint.

### LENOVO THINKSHIELD REMOTE SUPERVISOR PASSWORD (RSVP)

Lenovo ThinkShield RSVP, powered with Absolute Persistence technology, allows IT admins to remotely reach Lenovo devices to create, update, or remove supervisor passwords, thereby reducing the risk of firmware compromise. It enables scalable supervisor password protection to ensure corporate assets & data are always protected and eliminates reliance on vulnerable processes by securing system configurations at the firmware level.

### LENOVO SECURITY ASSURANCE

Lenovo Security Assurance, powered by Absolute, allows you to defend data privacy, update and self-heal cybersecurity applications, ensure protection is in place to prevent any data breach, and provide remote supervisor password (RSVP). It leverages Absolute technology in the firmware to fortify critical security applications through self-healing technology.

ENFORCE ENDPOINT SECURITY STANDARDS TO MEET YOUR  
SECURITY BENCHMARKS
