# Free 1 Year Trial Subscription

# XClarity One

Lenovo XClarity One is a hybrid cloud-based ITOps platform that simplifies IT administration. It provides a single interface to deploy, manage, and support your entire infrastructure, from the edge to the data center.

XClarity One is the next milestone in Lenovo's portfolio of systems management products. Now you can leverage the benefits of a hybrid cloud-based solution for the deployment, management, and maintenance of your infrastructure through a single, intuitive interface that delivers a consistent user experience across all Lenovo products.

**October 2025**

Lenovo

# ■ About the Trial

The trial provides a complimentary 1 year subscription, with support, for the latest edition of XClarity One. You can now install and configure Lenovo XClarity One as a virtual machine in your local datacenter. It includes the same infrastructure and management functions (with a few exceptions) that you have when using XClarity One in the cloud.

- One Managed Device per License

**LFO 7S0X0014WW**
**FC SECY**

**2** Receive the license entitlement and instructions to download in email. You will be given a choice in how to deploy.

**3** Install the product and use it free of charge for 12 months.

Lenovo XClarity One Product Guide

# ■ What is ITOps

You rarely think about what powers your company's digital core—that's IT Operations. This unsung hero ensures uninterrupted operations, secure transactions, and innovation, turning technology from a liability into a competitive advantage. But as businesses expand and technology evolves, managing the complexity of their infrastructure can become a full-time job. IT Operations has to constantly adapt to new challenges, from security threats to the demand for faster deployments and greater efficiency, all while keeping the business running smoothly.
