

Powerful security operations software for service providers

Backed by 24/7/365 SOC service and support

Security data sources and tools are unified on Pillr, with SIEM, customizable SOAR workflows, and features to investigate and remediate threats collaboratively with the global Pillr SOC team. Pillr analyzes all of your customers' security data and correlates the resulting telemetry with over 35 threat intelligence feeds to produce validated alerts and reduce alert fatigue.

450+

data sources + tools

85+

analysts + threat hunters

5

dedicated SOCs

35+

threat intelligence feeds

A complete solution

- ✓ 24/7/365 SOC service
- ✓ SIEM expanded
- ✓ Unified PSA
- ✓ Advanced AV
- ✓ Integrated SOAR
- ✓ Instant IR support

Fast facts

- Executable files are inspected & hashed—including browser extensions
- File hashes & URLs are correlated with 35+ threat intel feeds to ID known malware
- Review risky files in isolated sandbox environment
- Configure behavior-based alerting on potential data leaks & email breaches
- Search application inventory to remediate past exposure to new-known threats
- Easily deploy & maintain agent through RMM software or an automated process
- Safeguard data across customers with dynamic access & permissions controls
- With support for 450+ data sources & tools
- 5 Pillr SOCs on a true 24/7/365 staffing model
- Data residency for international organizations
- Available incident response & pentesting services

Realizing value on the platform

24/7/365 SOC service and support

Our global SOC team supports yours in real time, delivering information and insights on known and potential threats with remediation guidance and support. Each Pillr SOC maintains a true 24/7/365 staffing model, so customers can access cybersecurity advisory no matter the day or time.

End-to-end data awareness

Pillr processes all of your customers' security data. Executable files are inspected and hashed—including browser extensions—and URLs are checked against malicious domains. Resulting telemetry is correlated with 35+ threat intelligence feeds to produce validated alerts and reduce alert fatigue.

Total data control

Analyze data in a customizable dashboard, investigate events with powerful threat intelligence tools, and work collaboratively with Pillr security analysts and threat hunters to remediate issues. With dynamic access and permissions controls to safeguard data across your managed customers.

Limitless integrations

Built to meet your current and future IT security needs. Today, Pillr integrates with 450+ industry leading security data sources and tools—with a commitment to developing support for any integration.

International support

Pillr offers data residency for international organizations, with security operations and support staff in Europe, the United Kingdom, and United States.
