

Airtame 1 Upgrade Program

Save \$100 per Airtame 2 device

Six months of Cloud Plus FREE

Airtame 1 devices will stop receiving firmware updates after December 31 2020. The Airtame 1 devices will continue to work with the Airtame desktop app and Airtame Cloud until at least 2022.

To support our customers ahead of this change, we've introduced the Airtame 1 Upgrade Program, allowing Airtame 1 users to upgrade to the newer Airtame 2 at a discounted price. While the key principles of the Airtame 2 are similar to the Airtame 1, the hardware and software has been significantly improved, increasing the value it creates for users.

What's the deal?

Simply trade in your old Airtame 1 device(s), and for each Airtame 2 you purchase, receive:

- A \$100 discount on the Airtame 2
- Free 6-month subscription to Airtame Cloud Plus, valued at \$72 per device (when billed monthly)
- A free consultation with an Airtame representative to get you set up with Airtame Cloud Plus

With the Airtame 2 discount and complimentary Cloud Plus subscription, this offer will save a total of \$172 per device.

Why upgrade to Airtame 2?

- Platform agnostic support for native streaming protocols including AirPlay, Google Cast and Miracast powered by AirServer
- Superior streaming performance and smoother playback
- Improved support for content distribution and digital signage
- More network integration options for IT administrators
- Expanded WiFi range and support for Power over Ethernet
- Better security features, with an optional Kensington lock

This deal will run until **December 31, 2020**.

If you're interested in hearing more, please reach out to your local account manager or [contact our sales team](#) to get started with Airtame 2.

*If you'd like to discuss trading in a competitor device for a discounted Airtame 2, please contact our [sales team](#).
