

Wireless screen sharing and digital signage

Looking to modernize your work environment? Equip your TVs, projectors and smartboards with the Airtame 2 and enjoy unlimited wireless presentations and inspiring digital signage.

Stress-free presentations for easier teamwork

- Engage teams with wireless presenting. Connect from any device using the Airtame app, Google Cast, AirPlay or Miracast*.
- Mirror your full screen or a single window, with the option to share to multiple displays from the app on your computer.
- Enable the pin code prompt to ensure connectivity to the right display and prevent unwanted connections.

*Miracast coming early 2020, powered by AirServer

Customizable signage for the informative company

- To start (and finish) meetings on time, synchronize calendars with screens to exhibit room agendas and availability.
- Motivate teams by showcasing real-time news, performance dashboards and more.
- Set the mood with welcome messages, images, videos or slides.
- Schedule screens to turn on and off according to office hours.

Available with Airtame Cloud Plus

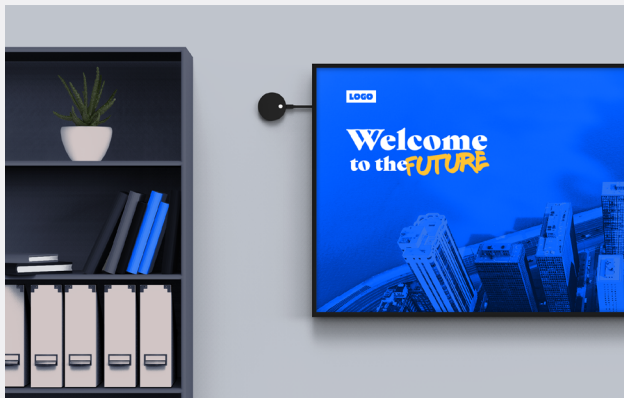

Cloud management for efficient maintenance

- Equip the IT department with real-time, remote access to device management in Airtame Cloud.
- Edit settings and carry out updates in bulk.
- Assign user roles based on rank, location and use case.
- Save time and effort with collaboration that scales with company growth.

Available with all Airtame Cloud plans

Security for enterprise setups

- Integrate Airtame seamlessly into your enterprise network to let users connect safely across VLANs.
- Authenticate your Airtames in a Windows domain.
- Configure a web proxy to filter internet access.
- Get support from Airtame's network specialists for optimal integration.
