

Microsoft Azure Assessments: Laying the foundation for success

A one-for-one migration strategy often leads to unnecessary cost; but with the right strategy and your help, customers can avoid unintended consequences.

Provisioning of traditional IT resources is different with Microsoft Azure.

When considering the migration of any data or applications to the cloud, D&H's Microsoft Azure Assessments are an ideal starting point. These analysis services help you to evaluate the costs, risks and readiness for migrating customers' workloads to the Microsoft cloud.

D&H provides Azure assessments, migrations, and management to MSPs to help deploy and manage full-scale cloud IT infrastructures with industry-leading tools and services.

- Evaluating the costs, benefits and ROI of an Azure cloud migration.
- Understanding the readiness of specific workloads, applications and databases for Azure.
- Prioritizing which applications to migrate first and which applications should remain on premise.
- Creating a roadmap, including costs and timing for a larger cloud strategy.

FREE Azure Assessments!*

Get Started

Now through June 30th, 2020, D&H is covering the cost of assessments so that Partners can get a better understanding of customers' infrastructure and on-site technologies to help identify which workflows can be moved to the cloud.
