Acronis

Protect Microsoft 365 with **Acronis** Cyber Backup

The most reliable and easy-to-use backup for businesses of all sizes

WHY THIRD-PARTY MICROSOFT 365 BACKUP IS CRITICAL

Microsoft 365 is rapidly becoming the go-to productivity solution for many companies. More than 130 million active monthly commercial users rely on Microsoft 365, according to Microsoft. Meanwhile many IT professionals are still laboring under a dangerous misconception that Microsoft provides full-fledged data protection for Microsoft 365.

The reality is that while Microsoft provides infrastructure resilience, data protection remains the customer's responsibility. And without third-party backup, sensitive business data such as emails or shared files stored in Microsoft 365 are not protected from the most common or most serious data loss issues (e.g. accidental deletions, malware attacks).

With Acronis Cyber Backup for Microsoft 365 you can regain control of your Microsoft 365 data, manage unnecessary expenses, and keep your business running with an easy to use, efficient, and secure cloud-to-cloud backup solution in place.

ACRONIS CYBER BACKUP FOR MICROSOFT 365 LETS YOU WORK WORRY-FREE

- Safeguard Microsoft 365 data from a wide range of threats
- Stay compliant with legal and regulatory mandates
- Ensure business continuity and meet shorter RTOs (recovery time objective)
- Access backed-up Microsoft 365 data quickly with easy search capabilities

WHY ACRONIS CYBER BACKUP FOR MICROSOFT 365

Convenient agentless backup
Enjoy simplified configuration and maintenance of the solution. With Acronis Cyber Backup for Microsoft 365, there's no need to install an agent on the customer's premises. It's already running in the secure Acronis Cloud Storage.

Quick granular restore
Avoid downtime and ensure business continuity by recovering in seconds. Granularly back up and restore required pieces of data such as emails, files, sites, contacts, attachments, etc.

One solution for any workload
Save on licensing, education, and integration. Acronis Cyber Backup is a scalable solution that protects 20+ platforms—physical, virtual, cloud, or mobile. Manage any kind of data protection task and protect any piece of your company's data.

EFFORTLESS BACKUP WITH CLOUD DEPLOYMENT

Start quickly with no upfront costs and save on trainings and maintenance. With Acronis Cyber Backup you can back up data from Microsoft data centers directly to highly secure Acronis data centers.

Exchange Online
Protect emails, attachments, contacts, tasks, group mailboxes, archive mailboxes, and calendars.
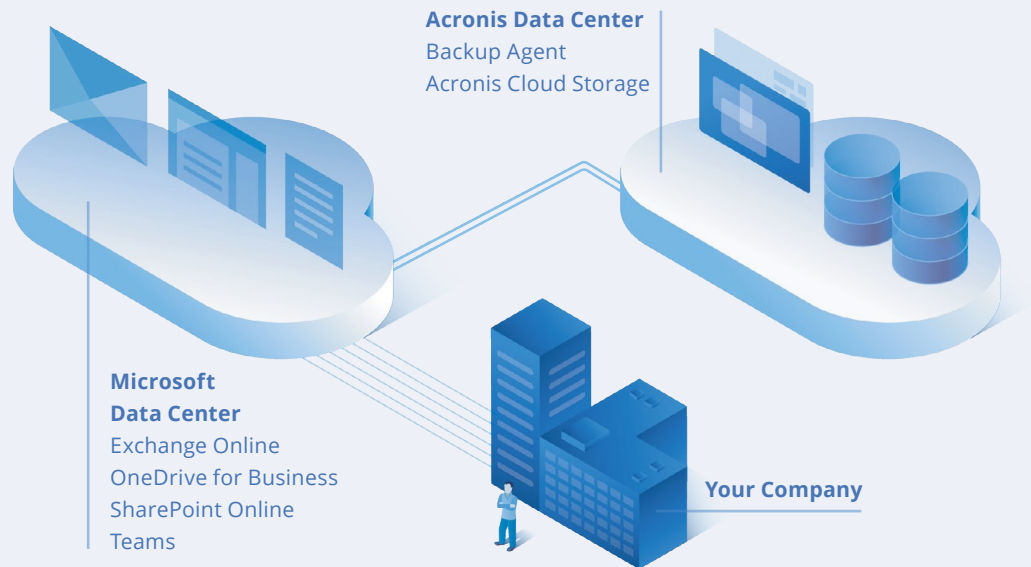

OneDrive for Business
Safeguard files and folders including all access permissions, if necessary.

SharePoint Online
Secure site collections, team sites, communication sites, and all access permissions settings.

Teams
Protect Microsoft Teams data, including team's name, member list, team channels and their content, team mailbox, meetings, and team sites.

KEY FEATURES TO PROTECT YOUR MICROSOFT 365 DATA

Intuitive user-interface
Administer the solution and perform backup tasks using a user-friendly, modern interface. Reduce costs and time spent learning the solution and implementing it.

Automatic protection for new Microsoft 365 items
Reduce headaches by streamlining backup management for Microsoft 365. New users, groups, and sites are automatically protected.

Quick backup search
Find a file you need in seconds. Enhanced search for mailboxes allows users to search by email subject, recipient, sender, and date. In addition, users can search with word forms or partial information and can also search Teams, OneDrive for Business and SharePoint Online by site item and file name.

Powerful status monitoring
Achieve higher levels of transparency and security thanks to advanced reporting capabilities and backup-status monitoring, including widgets, notifications, and alerts for critical events.

MFA (Multi-Factor Authentication) support
Add an additional layer of security, like authentication via a trusted device or fingerprint. Without MFA, your password is the only verification method.

Multi-level encryption
Safeguard your data with additional security. At-source, enterprise-grade AES-256 encryption protects backups with irreversibly encrypted passwords.
