

Protect your business
with the leading
password manager
built for SMBs

Password security is the largest security threat facing your business

Weak and stolen passwords account for 81% of security breaches. Password Boss protects every password in your business with an easy to use app that creates unique passwords for every user and every site.

Some of the best reasons to choose Password Boss

Complete Password Security

Password Boss uses world class security to protect your information from hackers and cyber criminals.

Easy Password Sharing

Your team can securely share passwords with others and revoke access when needed.

Visibility So You Can Take Action

Password Boss shows you where your security risks are so you can take action.

Fast User Adoption

Intuitive design, strong password generator and website autofill keep your users happy.

Rapid Deployment

Onboard users quickly from the management portal. Simple Active Directory integration.

Dark Web Scanning

Hacked passwords put your business at risk. Our Dark Web scans show you where those risks are.

Take passwords off of your worry list

Password Boss instantly secures passwords across your entire company, provides a safe and secure way for your team to share passwords and gives you visibility to know strong passwords are actually being used.

Access Every Password on Every Device

- Password Boss gives your user's secure access to their passwords from each of their devices.
- When an item is changed on one device, the changes are synchronized to all of the user's devices automatically.
- End-to-end security and a zero knowledge architecture keeps your passwords secure.

Centralized Admin Control

All of the features you need to take control of your password security.

Easy User Management

Quickly onboard users, configure access to shared passwords and enforce team security.

Actionable Insights

Security Score, Dark Web scans and full audit reporting show where your vulnerabilities are.

Custom Security Policies

Bring security best practices to your team with our complete set of security policies.
