For customers who need TAA (19 U.S.C.
§§2501-2581) compliant product, MSI
can custom manufacture in Taiwan or
the US and provide a TAA Compliance
Statement to satisfy U.S. Government
requirements.

*Upon request for Select models

Enterprise Grade Security w/ TPM 2.0

Trusted Platform Module (TPM) technology is designed to
provide hardware-based, security-related functions. You can
store data & password with encryption keys for advanced
security. Safeguard your data; device lock centrally manages
access to USB ports and the SD card slot, adding an extra
layer of security to safeguard your data.

Windows 10 Pro

MSI offers Windows 10 Pro, an operation system that
provides advanced security protections, enterprise
manageability, and enhanced productivity tools.

VPRO Capable

The Intel vPro® platform is built for business. This integrated
platform delivers the latest PC technologies in one validated
solution built to provide what IT needs and employees want.
It brings together business-class performance,
hardware-enhanced security features, modern remote
manageability, and PC fleet stability. It's all the things you
need your PCs to be. Accelerate productivity and reduce
your costs—all while giving your people a great user
experience.

MICROSOFT AUTOPILOT

MSI offers technologies to setup and pre-configure new
devices, getting them ready for your specific workplace
needs. Windows Autopilot simplifies the Windows device
lifecycle, for both IT and end users, from initial deployment
to end of life. Using cloud-based services, Windows
Autopilot: reduces the time IT spends on deploying,
managing, and retiring devices, reduces the infrastructure
required to maintain the devices, and maximizes ease of use
for all types of end users.

msi
